Horsepower differences shown result from differences in test rpm, allowable test tolerances, and/or installation of special kit components. 3 Measured using an accurate service tachometer with engine at normal operating temperature. 4 A special procedure must be followed to check or adjust timing. Consult your Authorized mercury MerCruiser Dealer before attempting this procedure. 5 A special procedure must be followed to adjust idle rpm. Consult your Authorized Mercury MerCruiser Dealer before attempting this procedure. All,

I have just purchased a 95 bayliner 2050 SS that has a 5.0 mercruiser. I can't find the hp rating on it anywhere. I'm probably not looking in the right place. The previous owner said he thought it was 205, but I thought that was a little low for a V-8 of this model. I had a 78 5.0 with 4 bbl and it was 228 hp. This is the 2bbl, so that could be correct. I thought I had heard that the 5.0 with 2bbl was 220 hp, but that may be newer models.

Let me know where I can find it and if this is a rated hp for this motor/year model.

Thanks,
Kevin Re: MerCruiser 5.0 Horsepower Rating kev
there should be id numbers for everything right on top of the motor you need that motor # to get a correct answer

tommys Re: MerCruiser 5.0 Horsepower Rating propshaft HP:

5.0L (2bbl - 190hp)
5.0LX (4 bbl - 205hp)

The newer models do have better HP
Your 78 was not rated at the prop... Re: MerCruiser 5.0 Horsepower Rating So, you are saying that a 95 4bbl has 205 hp?

I thought the 4.3 4bbl had more than that. Re: MerCruiser 5.0 Horsepower Rating My '95 4bbl 5.7 was rated a 235 hp at the prop. Re: MerCruiser 5.0 Horsepower Rating The 4.3 4bbl says 180 hp at the prop Re: MerCruiser 5.0 Horsepower Rating That was wrong, the 4.3 4 bbl wasn't listed. The 4.3 2 bbl was listed as 180 hp. Re: MerCruiser 5.0 Horsepower Rating I'll add to the confusion:

2004, 5.0L 2bbl, 220HP Re: MerCruiser 5.0 Horsepower Rating I guess I was wondering if my 95 was same as the 04 @ 220 hp.

To be honest, I haven't looked under the cover to verify I have a 2bbl. I bought it last Saturday and left it in my dad's garage.

There's just something about having 220 hp vs. 205 hp that makes you feel better.

I guess it doesn't really matter how much I have b/c I'm only going as fast as it will take me!

Ratfish, what kind of boat do you have and how fast can you go with the 5.0 Re: MerCruiser 5.0 Horsepower Rating kev_79,

Remember this...

Torque - Gets you moving.

HP - Keeps you moving.

I do a lot of water sports and usually have a full compliment of passengers. IMHO, Torque is the name of the game. You want lots of it with a flat curve across the RPM range.

I have a 2004 Bayliner 205 (20'4") with the 5.0L mentioned above. With a stock 19P aluminum prop I hit 53 on the speedo (No GPS). I had about a half tank of gas, minimal gear and one other person on board. I was going with the wind and tide on a tidal river. Trim was set for maximum speed. Re: MerCruiser 5.0 Horsepower Rating My Merc service manual confirm Rabidfish's numbers. The latter, post '97, use vortec heads and do have higher hp. Re: MerCruiser 5.0 Horsepower Rating What's different about vortec heads? Roller rockers or a different head all together? Re: MerCruiser 5.0 Horsepower Rating Different head with improved combustion chamber and taller intake ports (requires a specific vortec intake manifold). Used on most mercruiser engines, starting around 1997/1998. Do a web search, lots of info. Re: MerCruiser 5.0 Horsepower Rating It's true, the Vortec 4.3L make more HP than that 5.0L

It's also true that the 5.0MPI (vortec) makes as much as the old 5.7L (260hp) 'Course... The new 5.7MPI make 300, etc, etc, etc...

Who wants one shipped to them... anyone???

Just email your credit card number... Re: MerCruiser 5.0 Horsepower Rating Just purchased an upgrade engine for my 84 Chaparral. Had a Merc 5.0 with 4bbl that said 228hp on cover, upgrading to a 5.7 4bbl with 300hp. This should really wake this boat up. MerCruiser 3.0 MPI/TKS - 181 cid The MerCruiser 5.0-liter engine, manufactured by Mercury Marine, was designed, according to boattest.com, to be affordable and dependable. It utilizes the Thunderbold V-ignition system. With this system, it is possible for carbureted engines to provide many of the same engine-management benefits associated with fuel-injection engines. The MerCruiser 5.0-liter engine weighs 952 pounds and is 22 inches tall. It is 32 inches long and 30 inches wide. The V8 engine gets 260 horsepower, displacement of 305 cubic inches, normal aspiration, generates 4,600 to 5,000 revolutions per minute, has a bore of 3.73 inches and a 3.48-inch stroke. The alternator gets a 65-ampere output rating. The MerCruiser 5.0-liter engine uses 87 Octane fuel in its multi-point, electronic fuel-injection system. The ignition system uses a crank-fired, high-voltage switch with knock control. The cooling system is a thermostatically-controlled, raw-water system. The engine also has an iron-manifold exhaust system. The MerCruiser 5.0-liter includes a dry-joint exhaust system. This eliminates the chance of water leaking into the engine, and increases resistance to corrosion, according to MercuryMarine. The fuel filter separates water to prevent it from entering the fuel system. This engine also offers an exclusive alarm system, as notification of low oil pressure, high water temperature or excessive temperature in the transmission. A drive-lube monitor is affixed to the top of the engine, for quick accessibility. Boattest.com states that the MerCruiser's 5.0-liter engine starts easily, regardless of temperature, due to its multi-port, fuel-injection system. It automatically adjusts for any weather or altitude changes. The report further states that this engine performs very well, regardless of environment.
